

# Cabinet Refacing Client Testimonial

*We now proudly have a completely updated kitchen that looks like a million bucks. They were right. We are very happy with the quality and craftsmanship of 50 Lakes Cabinet Design and it was worth every penny.*

In 2016, Mike and Adrienne purchased their home that was built in 1986 on the west end of Oak Island. Here is their Refacing Story.

Our kitchen had dark wood cabinets and was in need of a major facelift. We were looking for a lower cost alternative other than to completely gut the kitchen. We called 50 Lakes Cabinet Design and had a very nice conversation with Jackie. After many questions we liked what we heard and asked Dave and Jackie if they could come to our home and discuss our options. They were here the next day! They arrived on time and were eager to give us guidance. Both my wife and I work crazy hours and our main concern about a complete remodel was the timeframe it would take to get back up and running so we were leaning towards refacing, rather than replacing our cabinets.

After many telephone calls, emails and in-person conversations we had an estimate for both cabinet refacing and cabinet replacement complete with renderings of each. Refacing looked like the best option for us. We were skeptical at first but were assured that we would have a "new" kitchen in a fraction of the time (two to three days)...we shall see. We asked for references and were promptly given five. We called all of them and they could not speak highly enough of Dave and Jackie. It was almost too good to be true. We decided to go forward with the project.

Dave and Jackie came over the day before the project was to begin and answered any and ALL questions we had and went over everything we had asked for one last time.

## 50Lakes Cabinet Design

Whole Home Cabinet Design and Installation, Cabinet Refacing, and more!

# “We were back in business immediately!”

## The Project and the Results

On the first day of the refacing project, we left for a weekend getaway in Asheville and the 50 Lakes Cabinet Design team arrived right on time. They sent us pictures of the install as it progressed as not to keep us in the dark. We arrived home two days later and all I can say is **WOW!** Not only did we have a completely updated kitchen, it was clean, beautiful and everything that was discussed was completed and more. The detail that went into the refacing is unmatched - Big things like the new drawers that actually pull all the way out, soft close hinges, new doors, the new cabinets we had custom built (outstanding to say the least) and the little details like the molding around the cabinets, full shelves, metal shelf pins instead of plastic. No detail was left out.

We now proudly have a completely updated kitchen that looks like a million bucks. They were right. We are very happy with the quality and craftsmanship of 50 Lakes Cabinet Design and it was worth every penny. The nice thing was that the completed product actually looked better than the renderings they gave us. Cabinet refacing was the best decision in our case, no demo and we were back in business immediately.

We will definitely be recommending Dave and Jackie to all our friends. They actually listened to our needs, wants and concerns, and made it a reality. They were always professional, friendly, courteous, very responsive to our concerns, and never got frustrated with our sometimes uncertain decision-making. It was refreshing and a relief to finally deal with people who actually give us what we asked for and more and didn't take advantage of us. Thank you 50 Lakes Cabinet Design for a very seamless, quick, painless, awesome experience. The wife is very happy and so am I!

We helped Mike and Adrienne decide whether to Replace or Reface their cabinets. We can help you too!
